Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

APPROVED

By Olivia Yu at 10:45 am, Feb 26, 2018

If a Watercourse was Impacted, Describe Fully.*
N/A

Describe Cause of Problem and Remedial Action Taken.*
The release was caused by an open valve on an open end poly line. A vacuum truck recovered standing fluid. COG assigned ASSI to remediate the spill. ASI sampled the spill and prepared a work plan.

Describe Area Affected and Cleanup Action Taken.*
The site was remediated by ASSI in 2017, impacted material was excavated and sent to R-360 for proper disposal. Confirmation samples were collected and sent to an NMOCD approved laboratory, which determined Chloride levels were less than NMOCD regulatory standards. Subsequently, the Site was backfilled and the surface has been restored.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
