---

Mr. Pope:

NMOCD approves of the delineation completed for 1RP-4202 and the proposed remediation plan with these conditions:

- Bottom and sidewall confirmation samples at approximately 75 ft. intervals and representative of potential pooling locations, based on delineation data. Proceed to the next foot if the chlorides analyses exceed 600 mg/kg.
- Demarcate on an appropriately scaled map confirmation sample locations.

Thanks,

Olivia Yu  
Environmental Specialist  
NMOCD, District I  
[Olivia.yu@state.nm.us](mailto:Olivia.yu@state.nm.us)  
575-393-6161 x113

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Mr. Martin & Ms. Yu,

Please find the attached Work Plan for the ConocoPhillips 1RP 4202-EVGSAU Injection Header 4 site, revised to include a revegetation plan. This revised document is being submitted for your review and approval, if in agreement, so Tetra Tech may proceed with the described remedial action. Please call me or reply to this email with any questions or comments. Thank you.

The New Mexico State Land Office has reviewed the 3 work plans shown above and the remediation plans included therein are acceptable as far as they go. Re-seeding requirements on state lands were not included in the plans. Therefore, I am attaching NMSLO policy regarding that subject. Please include these requirements in the plans referred to, and in any future work plans you submit that concern state trust lands. For the time being, I am your NMSLO contact for these remediation plans.

Thank you and contact me if you have questions.
