Mr. Pope:

Please be advised that since the release area for 1RP-4233 encompasses the surface of a reserve pit, release characterization is not completed.

Please propose a course of action to address the impacted area over the reserve pit. A scaled map will be required with the release point and additional delineation sample locations marked.

Thanks,
Olivia

Mr. Martin & Ms. Yu,

Please find the attached Work Plan for the ConocoPhillips 1RP 4233-EVGSAU 3366-029 site, revised to include a revegetation plan. This revised document is being submitted for your review and approval, if in agreement, so Tetra Tech may proceed with the described remedial action. Please call me or reply to this email with any questions or comments. Thank you.

The New Mexico State Land Office has reviewed the 3 work plans shown above and the remediation plans included therein are acceptable as far as they go. Re-seeding requirements on state lands were not included in the plans. Therefore, I am attaching NMSLO policy regarding that subject. Please include these requirements in the plans referred to, and in any future work plans you submit that concern state trust lands. For the time being, I am your NMSLO contact for these remediation plans.

Thank you and contact me if you have questions.
