Good Morning,

NMSLO agrees with NMOCD on all listed concerns.

Thank you,

### **Amber Groves**

Remediation Specialist Field Operations Division (575)392-3697 (575)263-3209 cell New Mexico State Land Office 2827 N. Dal Paso Suite 117 Hobbs, NM 88240

\*My last day with NMSLO will be January 11, 2018. All ROE inquiries will need to go to Conrad Kegel at <u>ckegel@slo.state.nm.us</u>. Any release that is over 10 bbls of OIL will need to be reported to Kenda Montoya at <u>kmontoya@slo.state.nm.us</u>. Once my position is filled, you will be notified on who to copy on submittals to NMOCD. It has been a pleasure working with you!

Amber:

If you have not already received a copy from Mr. Asher, attached is an optimized smaller pdf for your

review.

Thanks, Olivia

Good Morning,

I do not seem to have a copy of this for approval. Please send one for review.

Thank you,

Subject: RE: Characterization Plan (McBride BEH State Com #1)

Dear Mr. Asher:

Please address these concerns regarding the proposed delineation for 1RP-4827:

- Please be advised that in general, stockpiled blended soil for use as backfill is not an acceptable NMOCD remedial activity.
- Based on the information written, please verify that the first depth for delineation sampling will be taken at 1 ft. depth bgs.
- The figures showed only one sample location within the release area. Please note that more than one sample location for delineation may be necessary.
- Laboratory analyses must demonstrate at least two depths (depth obtained and depth maintained at least 2 ft further in depth) with permissible levels of BTEX and TPH extended.
   A portion of the samples must be submitted for laboratory analysis of chloride concentrations using EPA Method 300.
- If CP-3 or NE/NW excavation corner samples are above permissible levels, delineation must be extended laterally.
- All laboratory analyses should have accompanying field data.

Please confirm or inform for clarification.

Thanks,

Olivia Yu Environmental Specialist NMOCD, District I <u>Olivia.yu@state.nm.us</u> 575-393-6161 x113

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.
