Dear Ms. Haskell:

NMOCD will grant closure to 1RP-4726, but also agrees with NMSLO. There were no photo documentation provided for the release characterization, remediation, or backfill stages for verification. For future closures, please provide photo documentation of the release area.

The available information indicates **OPERATOR** has met the requirements of 19.15.29 NMAC and no further corrective action is required. NMOCD considers **1RP-4726** closed. This determination by the Oil Conservation Division does not relieve Operator of responsibility should future information indicate a threat to ground water, surface water, human health, or the environment. Furthermore, it does not relieve Operator of responsibility for compliance with any federal, state, or local laws and/or regulations.

Thanks,

Olivia Yu
Environmental Specialist
NMOCD, District I
Olivia.yu@state.nm.us
575-393-6161 x113

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Mr. Hitchcock,

NMSLO will agrees that the location has been remediated and possibly seeded, but NMSLO cannot

grant closure until the site has been successfully revegetated. In the future, when submitting closure documents that involve a revegetation component I would greatly appreciate photographs.
