**Subject:** RE: Case # 1RP-4935 Remediation Plan  
**Date:** Tuesday, August 14, 2018 4:44:00 PM  
**Attachments:** approved\_Venable's 1RP-4935 Remediation Plan-July 18.pdf

---

Mr. Sanders:

Thank you for your patience and comprehensive soil sampling. NMOCD approves of the delineation completed for 1RP-4935. For the proposed remediation, please clarify these points:

1. Where were samples Con 2001 to 2004 taken and at what depth? TPH levels are above permissible limits and Con 2004 exceeds permissible chloride levels.
2. For the samples taken on May 25, 2018, were the Overspray stockpile discrete samples taken from the surface of the stockpile? If so, please be advised that if the stockpiled soil is proposed for use in backfilling, blended samples will need to be tested every 75 cubic yards. TPH levels are above permissible limits.
3. For the surface samples taken on May 25, 2018 from the overspray area, chloride levels in the samples for Surface 2 and 3 will need to be addressed. Recommendation is a surface scrape.

Also, please be advised that Appendix 2 does not contain a figure with the area for revegetation outlined. Please include NMSLO seed mix in the subsequent closure report for 1RP-4935.

Thanks,  
Olivia
