**APPROVED**  
*By Olivia Yu at 9:44 am, Sep 05, 2018*

**If a Watercourse was Impacted, Describe Fully.\***  
N/A

**Describe Cause of Problem and Remedial Action Taken.\***  
Lightning struck a 500bbl fiberglass produced water tank causing it to catch on fire and structurally compromising it. The well was immediately shut in and 911 was contacted. The fire department assisted in extinguishing the fire. Approximately 102bbbls of produced water was in the tank when the lightning struck. 0bbbls produced water was recovered. A portion of the released fluids evaporated due to the fire while the remaining fluid was absorbed into the soil. All fluids stayed inside the earthen berm containment and on location.

**Describe Area Affected and Cleanup Action Taken.\***  
The release was contained to the lined facility. The facility infrastructure was removed. Confirmation soil samples were taken. The impacted area was vertically/horizontally delineated and remediated by Talon/LPE per NMOCD guidelines.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
