OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Subject: RE: Workplan for CVU 106/136 Interim Remediation

Aloha all,

The OCD conditionally approves the plan as written.

A quarterly monitoring with yearly report of the status of the site is requested. In addition please implement a program whereby staff who frequent the site assist in monitoring so that any events are caught earlier than on a quarterly basis.

Please keep me informed.

Mahalo

Subject: Workplan for CVU 106/136 Interim Remediation

All,

I have attached the interim work plan for the above referenced site. The presence of underground utilities makes remediation at this site difficult and risky. The interim approach described in the work plan is being proposed to minimize the potential for ground water impacts until final remediation can be performed. The proposed scope of work was discussed and verbally agreed to by the New Mexico State Land Office. Please feel free to contact me if you have any questions,

Bernie
