Scott:

Thank you for your patience. NMOCD approves of the proposed additional delineation plan and location of MW-2 for 1RP-1498. Please note that based on the data in Figure 4, a proposed horizontal delineation sample location has been shifted to another location, as demarcated on Figure 1 'Proposed Boring Location Map.' Does this make sense?

Please confirm or inform for clarifications.

Thanks,

Olivia Yu
Environmental Specialist
NMOCD, District I

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.
