Scott:

Although after the fact, to complete documentation, NMOCD approves of the additional delineation/release characterization plan and groundwater monitoring well location for 1RP-1483. Please see attachment for your records.

Please note that the proposed sample location Southwest of SB-8 is approximately 500 ft. Northeast of the an NMOSE-identified playa, which is a waterbody of New Mexico.

NMSLO approval required. NMSLO may have additional concerns or stipulations.

Thanks,

Olivia Yu
Environmental Specialist
NMOCD, District I

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.
