Good morning Mr. Batt:

Please be advised that NMOCD databases indicate conflicting information regarding Federal surface and minerals ownerships. BLM can verify. If applicable, BLM approval required.

For future releases, please note that all corresponding agencies must be included in correspondence and report submittals. Also, please keep in mind that

1. Per 19.15.29.10 NMAC, a major release necessitates immediate notification to NMOCD Environmental Bureau chief, in addition to District office. Mr. Jim Griswold contact information can be found online.
2. Per 19.15.29.13 NMAC, regulations of corresponding agencies supersede NMOCD's.

Thank you for your prompt response to this release.

The available information indicates **OPERATOR** has met the requirements of 19.15.29 NMAC and no further corrective action is required. NMOCD considers **1RP-5165** closed. However, this determination by the Oil Conservation Division does not relieve Operator of responsibility should future information indicate a threat to ground water, surface water, human health, or the environment. Furthermore, it does not relieve Operator of responsibility for compliance with any federal, state, or local laws and/or regulations.

Thanks,

Olivia Yu

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Good morning Messrs. Walker & Batt:

Thank you for your prompt response to the release under 1RP-5165. Please be advised that all sections of the C-141 must signed by the Responsible Party, unless the Responsible Operator include a letter declaring the authority of the agent. Please resubmit the closure portion of the C-141 form.

Thanks,
Olivia
