Subject: RE: Initial C-141 - Morab 29-20 Fed Com 2H - Spill 9/19/18
Date: Thursday, September 27, 2018 4:04:00 PM
Attachments: 1RP5212_Morab 29-20 FC 2H_Initial C141 Spill 9.19.18.pdf

Ms. Menoud:

Please note that NMOCD databases do not show either State surface or minerals ownership for this release location. NMSLO can verify.

Please be advised that

1. The initial portion of the C-141 form does not include the calculations to determine the release volume. Visual estimation is not sufficient nor adequate. Please submit measurements in volume estimation; including dimensions, soil parameters (porosity, texture, bulk density, etc).
2. Dated, geo-referenced photo documentation for verification that the initial response activities have been employed to contain the release are requested.
3. Per 19.15.29.13 NMAC, regulations of corresponding agencies supersede NMOCD's.

The 1RP for this incident is

5212	9/27/2018	A	Devon Energy Production	Morab 29-20 Fed Com 2H	30-025- 43775	25S-32E- 29F	9/19/2018
-------------	-----------	---	----------------------------	---------------------------	------------------	-----------------	-----------

Please remember to include this 1RP identifier to all communications. Revised NMAC 19.15.29 was effective on August 14, 2018. Delineate and remediate per regulation. Mind the timelines for submittal of requisite information.

Please be advised that NMOCD recommends a completed site characterization/delineation report be reviewed or approved by NMOCD BEFORE any significant remediation work towards closure.

Thanks,

Olivia Yu
Environmental Specialist

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.
