Good morning Mr. Krehbiel:

The submitted site assessment for 1RP-3264 was reviewed and NMOCD will approve of the proposed course of action contingent upon the responses to the following comments:

1. Provide soil bore logs for the 2013 sample event and tabulate soil bore data to assist in assessment.
2. Provide EC survey results and relevant figures.
3. Confirm that the excavated areas in green are also the dimensions of the lined areas.
4. Are there delineation data for western portion of the release?

Thanks,
Olivia

Mr. Krehbiel:

Thank you for clarifying this detail with Mr. Michelson. The C-141 for West Vacuum Unit #68 will be removed from under 1RP-3264 and issued a current 1RP.

Thanks,
Olivia

Ms. Yu,

Pursuant to our discussion, VGWU 61 (1RP-3264) should only pertain to the October 16, 2012 release given the proximity to the other release.

Thank you!

Subject: RE: Planned 2018 Remediation Activities – Scope of Work for VGWU 61

Mr. Krehbiel:

Please be advised that there was another initial C-141 uploaded under 1RP-3264, which refers to a release in a different location and date. Please inform if the release discovered on March 13, 2012 is proposed for inclusion under the current proposed work plan. If so, then the relevant background information and documentation of initial corrective actions must be submitted for consideration. Otherwise, NMOCD will issue a separate 1RP for the March 2012 release.

In the meanwhile, NMOCD will review the submitted report for 1RP-3264 as pertaining only to the October 16, 2012 release. Please remember to include identified 1RP-3264 to all subsequent reports to facilitate proper documentation.

Thanks,
Olivia
