Describe Cause of Problem and Remedial Action Taken.\*

Suspected vandalism – Sherriff department was called to location. Field specialist found open bleeder valve at bottom of tank. Isolated lease to close valve.

Describe Area Affected and Cleanup Action Taken.\*: Reference 1RP-4579

Fluid released into the bermed containment. Vacuum truck extracted standing liquid. Recovered 26 barrels produced water. Samples were collected and contaminated soil was excavated and hauled to a state approved disposal facility. Based on laboratory analytical data and NMOCD approval, the area was excavated, 20 mil poly liner installed and back filled with clean soil. Pictures attached for proof of clean-up.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
