Ms. Grant:

Please verify release location. Based on the GPS coordinates, aerial imagery from November 2017 does not show a tank battery nor is there a COG Mas Federal well in the vicinity.

Please be advised that

1. Per 19.15.29.13 NMAC, regulations of corresponding agencies supersede NMOCD's.
2. Dated, geo-referenced photo documentation for verification that the initial response activities have been employed to contain the release is requested.

The 1RP for this incident is

5239	10/17/2018	A	COG	Mas Federal 34A CTB		20S-34E-34A	10/8/2018
-------------	------------	---	-----	---------------------	--	-------------	-----------

Please remember to include this 1RP identifier to all communications. Delineate and remediate per regulation. Mind the timelines for submittal of requisite information.

Please be advised that NMOCD recommends a completed site characterization/delineation report be reviewed or approved by NMOCD BEFORE any significant remediation work towards closure.

Thanks,

Olivia Yu
Environmental Specialist
NMOCD, District I
Olivia.yu@state.nm.us
575-393-6161 x113

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Subject: [EXT] RE: (C-141 Initial) Mas Federal 34A CTB 10-08-2018

Ms. Yu,

Attached is the calculation sheet to determine the estimated release volume for Falcon Lined facilities and the location. The liquid lost estimate is based on the spill dimensions, estimated depth of fluid in the liner and in the soil on location. The spreadsheet will calculate the volume lost into the liner and into the soil on location. No gravel was present in this lined facility as it is a Falcon Liner. The unrecovered volume is a residue left behind on the liner and equipment which will be cleaned by pressure wash and the overspray on location. If you have any questions or concerns please do not hesitate to contact me.

Thank you,

DeAnn Grant
