Subject: RE: [EXT] 1RP-4881 - White Falcon 16 State #023H - Site Assessment Summary and Proposed Remediation Plan

Mr. Lowry:

NMOCD approves of the delineation completed for **1RP-4881**. The proposed remediation is also approved with these conditions:

- Submit Benzene, BTEX, TPH and chloride data analyses for all confirmation samples.
- At least one of the sidewall/edge samples is to be at the border between the different depths of excavation (between SP-1/SP-3 and SP-2 areas).
- Dated photo documentation of the remedial activities.
- Scaled map with the confirmation sample locations in relation to the delineation sample points.

NMISO approval required. NMSLO may have additional concerns or stipulations. Per 19.15.29.13E, NMSLO's regulations supersede NMOCD's.

Thanks,
Christina Hernandez

Christina.Hernandez@state.nm.us

OCED approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCED approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Subject: [EXT] 1RP-4881 - White Falcon 16 State #023H - Site Assessment Summary and Proposed Remediation Plan

Please find attached the *Site Assessment Summary and Proposed Remediation Plan* that has been prepared for the White Falcon 16 State #023H. The release site is located in Unit Letter "D", Sec. 16, Range 25 South, Township 35 East on land administered by the State Land Office. Upon your review and approval, COG is prepared to begin field activities as outlined in the attached *Remediation Plan*.

If you have any questions or need any additional information, please feel free to contact me by phone or email. Thanks.
