☐ Water Shut-Off

☐ Well Integrity

☐ Other

13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or to recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

- Request to Keep well in TA'ed status -

Justification for not plugging well:

The subject well has potential for re-completion in the Zones 1, 2, & 3 Zones @ 2752' to 2768', 2790-92, 2796-2800, & 2825' to 2836'. This zone correlates to a work over that was done in the Farmworth-B #1, in October of 2003. A Cement Bond Log will be run to verify the Top of Cement Behind the 7" Csg. prior to commencing the workover.

Note: A 7" CIBP WAS SET @ 2890' ON 11/29/99 & THE CASING WAS SUCCESSFULLY TESTED TO 500". Should SWR, Inc. need to perform another CIBT on the well please let us know & we will run a test.

14. I hereby certify that the foregoing is true and correct
