13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

This well was drilled in 2000. The Morrow was perforated at 13234' 13242' but was not productive. Recompletion opportunities are present in the wellbore in the Atoka, Bone Spring, and Delaware intervals.

A request to T/A this well was approved on June 11, 2003 following a successful pressure test of the casing. Since that time Devon has drilled two wells offsetting the subject well with the second well awaiting completion.

Devon is still evaluating the new offset well information for sidetrack opportunities to utilize this wellbore to further test the Morrow formation. We therefore request a one-year extension of the temporarily abandon status.

14. I hereby certify that the foregoing is true and correct.
