13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

The SJU C-22 was shut in the middle of 1999 (Arco) with poor production of about 2 BOPD and very low oil prices at that time. Henry has been doing some work on the waterflood and asked for an extension on this shut-in well 12-22-2003. We reactivated this well 5-3-04 and found it had a scab liner in it that needs some repairs. We put the well back on production to test it to see if it was economic for us to do the more expensive repairs and return it to production. Our testing has resulted in good production and we are still gathering prices and equipment to finish our repair of this well. Currently we are pumping it below a packer to not risk contaminating any other zones. We will send a supplemental form 3160 as soon as we finalize the work on this well. Thank you for your continued cooperation with allowing us to return this well to economic production.
