Return Well To Production: 4/26/04 Per FG

Well had been shut-in for sometime because it was believed to have a downhole problem.

1. TESTED electric service and was getting no power to motor.
2. Found bad place in buried electric line. Replaced.
3. Turned well on and pumped up to 300 psc in 10-12 strokes.
4. Determined well did not appear to have a downhole problem.
5. Replace packing. Turn well to battery and resume production.

NOTE: We will watch well to make sure well is actually pumping and producing into battery.
