APPROVED BY Alan W. BohlingTITLE PETROLEUM ENGINEERDATE SEP 24 2004

Conditions of approval, if any:

**ATTACHMENT FOR C-103 NOTICE OF INTENT TO: MULTIPLE
COMPLETION**

In accordance with OCD Order No. R-11363, Amending Rule 303.C, (Case No. 12346 with Exhibit "A") approved on April 26, 2000, Pure Resources, L. P. respectfully requests permission to Down Hole Commingle (DHC) the **Blinebry Oil & Gas (06660)** and the **Paddock (49210)** oil pools in the following well:

**Brunson Argo Well No. 13
731' FNL & 739' FEL
UL A, Sec. 9, T-22-S, R-37-E
Lea County, New Mexico**

| | | |
|-----------------------|--------------------|-----------------|
| Perforated Intervals: | Blinebry Oil & Gas | 5,480' – 5,752' |
| | Paddock | 5,020' – 5,400' |

Allocation Method: The Allocation of Production will be determined later by utilizing either the total commingled production rate minus the established production rate from the Blinebry Oil & Gas or from testing of each individual zone.

The Paddock interval is uneconomical to drill or complete as a stand-alone well. To develop these reserves, a dual or commingled completion is required. A dual completion is very costly and inefficient. Therefore, approval of DHC of production is necessary to prevent waste and enable recovery of Paddock reserves, which would otherwise remain undeveloped.

The lease is a Fee Lease with both intervals having common ownership and each interval is an oil zones producing both oil and gas. We do not anticipate any cross flow problems between these zones due to their depleted nature. The low producing volumes from each zone necessitates placing the well on pump and maintaining a pumped-off condition as much as possible. We are not aware of any incompatibility between the fluids produced from these intervals or expect any reduction in value or loss of reserves by downhole commingling.
