13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompletable horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletable in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

This well was shut-in on 9/11/04 due to lack of a market to sell the gas. The well was a commercial producer at the time of shut-in, making 2 BOPD and 61 MCFPD. The nearest gas market for this wet gas is six miles to the south, and the cost of laying a line to connect this well is prohibitive. It is possible that additional drilling will be done in the immediate area which will make it possible to lay the required line to market this gas.
