## FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

On June 15, 1950, 8 5/8" OD casing was set at 1807', and cemented with 100 sacks around the casing shoe. Then a string of 1" pipe was run to a depth of 250' on the outside of the casing, through which 100 sacks of cement was circulated from that point back to surface. The rotary rig was moved off the location. Cable tools are being moved onto the location, and we propose to drill the cement plug and test for water shut-off on about June 20, 1950.
