DETAILS OF WORK

O. C. C.
ARTESIA, OFFICE

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well with rotary tools to an approximate total depth of 8925 feet, unless commercial production is obtained at a lesser depth.

We will run approximately the following casing program:

300' 11 3/4" O. D. casing with sufficient cement to circulate

3000' 8 5/8" O. D. casing, cemented with 250 sacks cement

8925' 4 1/2" O. D. casing, cemented with 300 sacks cement.

SALT SECTION MUST BE ISOLATED FROM
FLUIDS ABOVE AND BELOW BY CEMENT.

NOTIFY USGS IN SUFFICIENT TIME TO

WITNESS CEMENTING THE 8925' 4 1/2" CASING.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
