Re: C-101, C-102, C-144

Gentlemen,

Please find enclosed 3 each of the above referenced forms executed for your handling.

Please note that MWS Producing, Inc. (MWS) currently has a producing well in production unit P of the 320acre unit noted on the C-102. The current well in unit P is the Boys Ranch #1, API # 30-041-20762 and is producing from the same pool indicated as the target pool on the C-101 re-entry. MWS proposes, upon completion of the re-entry, to shut-in the existing Boys Ranch #1 well until further notice of plugging or re-completion into a separate pool.

It is our belief that the re-entry prospect has a greater deliverability of gas than our current well in the target pool.

If you have any questions or require any additional data please do not hesitate to contact me at the numbers above. Your prompt attention is greatly appreciated.

Sincerely

Michael W. Swinson  
President
