13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

Aspen began work on the subject well on Nov. 24, 2004 to repair casing and return the well to disposal. We discovered that the tubing was essentially junk due to poor internal coating, and have only been able to recover 10,076' of the 12,200' in the well. We have discovered a major problem with the 5-1/2" casing at 9942', including an apparent dogleg, which prevents us from going further to extract the damaged tubing. Before proceeding with any work to sidetrack the wellbore, we propose to shut the well in and attempt a re-entry of another P&A'd wellbore in the area.

We propose and request permission to set a 25-sack plug in the 5-1/2" casing at 9942' - 9842', then nipple up the wellhead and shut it in for a period not to exceed 30 days. We will then either come back to sidetrack the well, or plug and abandon it.
