PULL OR ALTER CASING ☐ MULTIPLE COMPL ☒

SUBSEQUENT REPORT OF:

REMEDIAL WORK ☐ ALTERING CASING ☐
COMMENCE DRILLING OPNS. ☐ P AND A ☐
CASING/CEMENT JOB ☐

OTHER: Propose to Multiple Complete ☒

OTHER: ☐

13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

Pure Resources, L. P. proposes to multiple complete this well in the Penrose-Skelly; Grayburg and Wildcat; San Andres oil pools. This well has been multiple completed in the Blinebry, Drinkard, Paddock and Penrose-Skelly; Grayburg pools under Administrative Order MC 1253 dated November 26, 1962, when this well was operated by Amerada Petroleum Corporation in conjunction with it's original drilling permit and construction with four 2-7/8" casing strings cemented in a 9-7/8" wellbore. Pure Resources, L. P. would now like to plug back and abandon the Blinebry and Paddock in two of these casing strings (Strings #1 & #4, respectively). We propose to also plug back and abandon the Drinkard zone in String #2 and re-complete this string in the San Andres zone. Then, in String #3, we propose to plug back from the Lower Penrose-Skelly; Grayburg zone and re-complete in the Upper Penrose-Skelly; Grayburg zone. The end result (please see attached "Proposed" wellbore schematic) is to be multiple producing the San Andres zone from casing String #2 and producing the Upper Penrose Skelly; Grayburg zone from casing String #3. Casing Strings #1 & #4 will remain TA'd and inactive until such time as this wellbore is permanently plugged and abandoned.

I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that any pit or below-grade tank has been/will be constructed or closed according to NMOC guidelines ☐, a general permit ☐ or an (attached) alternative OCD-approved plan ☐.
