For closed-loop systems that only use above ground steel tanks or haul-off bins and propose to implement waste removal for closure, submit to the appropriate NMOCD District Office.

RECEIVED

Closed-Loop System Permit or Closure Plan Application

(that only use above ground steel tanks or haul-off bins and propose to implement waste removal for closure)

Type of action: ☒ Permit ☐ Closure

Instructions: Please submit one application (Form C-144 CLEZ) per individual closed-loop system request. For any application request other than for a closed-loop system that only use above ground steel tanks or haul-off bins and propose to implement waste removal for closure, please submit a Form C-144.

Please be advised that approval of this request does not relieve the operator of liability should operations result in pollution of surface water, ground water or the environment. Nor does approval relieve the operator of its responsibility to comply with any other applicable governmental authority's rules, regulations or ordinances.

Closed Loop System

Design

Drilling mud will circulate through a closed loop system of steel pits on the surface, mud pumps, piping on the surface. Drilling solids will be removed from the mud with the use of shale shakers and other solid removal equipment. Roll off bins and rails will be installed next to the steel pits so that solids removed from the solids removal equipment fall directly in to the bins. Once a bin is full, it is picked up by a truck and hauled to disposal. An empty bin is moved under the solids control equipment along the rail so that the solids control equipment can operate continuously.

Operations and Maintenance

Drilling rig personnel will monitor the operation and maintenance of the solids control equipment 24 hours a day while drilling. If equipment problems are identified the solids control equipment will be repaired or replaced. Drilling rig personnel will monitor the level of solids in the roll-off bins and arrange for trucks to pick up the bins when they are filled.

Closure Plan

Cuttings and other solids will be hauled off to permitted landfill according to NMOCD guidelines. Liquids will be re-used to the extent possible, but if liquids need to be disposed of, they will also be hauled to a permitted disposal facility.

For the Harton # 002 well, both solids and liquid water will be taken to the Gandy- Marley facility **NM01-0019** located between Tatum and Roswell, New Mexico
