13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Siana Operating LLC intends to put the well on production by performing the following work.

- 1.) Swab test existing Delaware perfs at 7,019-7,029 to determine productivity. If economic install rod pumping system and build production facility to produce well. If zone has excessive water cut, squeeze zone with cement and proceed to step #2.
- 2.) Run CBL-GR from 9,200' to 5,200' in 7-5/8" casing. Perforate Delaware zones at 6,767'-82' and 6,940'-54'. Acidize and swab test each zone separately. Determine economics of fracture treating either or both zones.
- 3.) Put all viable Delaware zones on rod pump. Potential test, report and put on production.
