Devon Energy Production Company LP respectfully request for the following:

The 8-3/4" hole will be plugged back because of insufficient build rates to land the curve. Current depth is 8,765 ft MD. The curve will be plugged from 8,765 ft to KOP with approximately 450 sxs Class H, 15.6 ppg, 1.18 cf/sk cement. Following the plugging operations the curve will be re-drilled. Actual cement volume will be adjusted based on caliper log results. Revised directional plan is attached.

The BLM was contacted prior to this work being done, with Devon obtaining "verbal approval". Jack Johnson was contacted on 6/5/11 at 16:30 CST at 575-393-3612.
