13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

This is the follow-up Sundry Notice for the Verbal Approval Luis Tarazona received from Edward Fernandez on 7/29/11.

OXY USA Inc respectfully requests to change the proposed Pilot hole TD that was amended from 8725'V to 9025'V (approved 7/22/11), and 9025'V to 10000'V (approved 7/27/11) to 10500'V. The well encountered the 1st Bone Spring Sand at 9871' and will remain within the Bone Spring Formation to the new proposed TD. The justification for the change is to evaluate shows encountered in the 1st Bone Spring in the last sample @ 9980-9990'. OXY is requesting the 10500'V TD in order to make sure we have enough rat hole for logs and to avoid having to amend yet again. In all likelihood, we will TD the well around 10100'V. After this has been evaluated a decision will be made on how and where to complete the well and revised plans will be submitted at that time.
