**APPROVED**

**By Olivia Yu at 8:57 am, Apr 17, 2018**

Describe Cause of Problem and Remedial Action Taken.\*

Spill due to pump went down causing tank to run over to secondary containment (lined berm).

Describe Area Affected and Cleanup Action Taken.\*

Reset pump and started injecting again. Vacuum truck extracted standing liquid. Recovered all 17.9 produced water. ). Liner has been inspected and found integrity to be in good condition (pictures attached). Steam wash tanks and liner to completely clean secondary containment.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

---

Good morning Ms. Barnhill:

To answer your question, a RP was probably not assigned because this release occurred entirely in a lined facility. Releases in lined facilities with either location or pasture impact may be issued a RP identifier.

In general, to resolve releases in lined facilities, two items are needed along with the final C141: 1) a statement of liner integrity assessment and 2) photo documentation, dated and geo-referenced, of the intact and cleaned liner/facility with the source point evident in the photos. NMOCD sincerely appreciates your compliance. Please be advised that initial/final C-141s are not accepted without statement of liner integrity and dated photo documentation of the cleaned facility, which is feasible within the 15-day period to submit a C-141 form for a reportable release.

This release occurred in District 2. However, in the interest of time, District 1 processed the C141 form.

The available information indicates **OPERATOR** has met the requirements of 19.15.29 NMAC and no further corrective action is required. NMOCD considers **nOY1810731931** closed. This determination by the Oil Conservation Division does not relieve Operator of responsibility should future information indicate a threat to ground water, surface water, human health, or the environment. Furthermore, it does not relieve Operator of responsibility for compliance with any federal, state, or local laws and/or regulations.

Like approval from BLM required.

Thanks,

Olivia Yu  
Environmental Specialist

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

**Subject:** Lotos Federal Spill

Was looking through my notes and found where I had called Olivia on this spill, but reported it as "Little Field". After researching and not finding a lease in that name, the API number submitted was for Lotos 11 Federal 2 and is "federal". I have had the C-141 saved under "Little Field". I apologize for the confusion and delay in submitting the C-141.
