If a Watercourse was Impacted, Describe Fully.\*  
N/A

Describe Cause of Problem and Remedial Action Taken.\*  
Power outage caused pump to go down on high discharge, wells were shut in but this well auto started and ran tank levels over. Truck arrived on site and immediately started pulling tank levels down.

Describe Area Affected and Cleanup Action Taken.\*  
Approximately 62bbbls produced water was released into lined containment. All 62bbbls produced water was recovered from lined containment. Containment liner was inspected for holes and none were found.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

---

Good afternoon,

Devon identified the following release at approximately 3:59 AM MST on 07/28/18.

1. Mean Green 23 Fed 1H Battery (API #30-025-41292)  
A produced water tank overflowed, releasing approximately 62 bbls of produced water into lined secondary containment. All fluid was recovered from the secondary containment.

A C-141 will be prepared and submitted with GPS coordinates of the area affected.

Thanks,

**Brett Fulks**  
EHS Representative
