This well was drilled as a dry hole, plugs set by drilling rig below 7 5/8" casing. TA'd. Then Hess drilled out to make a water well but decided to leave TA'd. Perf'd @ 1510', set a CIRC & CIRC/sqz'd cmt to surf, TA'd well again. Well never produced or perforated.

Note To Kerry: This is the well we emailed about end of June. We agreed to perf at the CIRC & attempt to sqz behind pipe, then plug from there.

WELL BORE INFO.
