Subject: Opening up additional perforations in SWD-827-B

Debbie,

I received your email asking if OK to remove a RBP to allow disposal down to 6044 rather than 6040 feet.

The decision on enforcement belongs to the Hobbs district office, but 4 feet is miniscule at over a mile deep – and lost in the types of measurement. I don't think this is an issue as far as the reservoir is involved, this is not a situation where the disposal well is right on top of the Capitan Reef.

As always, they should have an approved work sundry from Hobbs prior to doing any work.

Hope this helps,

Will
