13. Describe Proposed or Completed Operations (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Upon cementing the production casing on this well, the first stage was cemented up to the dv tool at 9000'. After dropping the bomb and opening up the dv tool, the second stage was being pumped with a pump truck and then switched to the rig pumps. During the switch the cement flash set. Yates Petroleum Corporation respectfully requests permission to close the dv tool and move the drilling rig off. A pulling unit will run a CBL, frac the well, then perform remedial cement work. The annulus is holding full with 9 1ppg mud.

Verbal approval given by Wesley Ingram, Carlsbad BLM at 9:15am on 9-2-11.  
Thank-You
