Form C-144 CLEZ  
July 21, 2008

For closed-loop systems that only use above ground steel tanks or haul-off bins and propose to implement waste removal for closure, submit to the appropriate NMOC District Office

**Closed-Loop System Permit or Closure Plan Application**

(that only use above ground steel tanks or haul-off bins and propose to implement waste removal for closure)

Type of action: ☒ Permit ☐ Closure

Instructions: Please submit one application (Form C-144 CLEZ) per individual closed-loop system request. For any application request other than for a closed-loop system that only use above ground steel tanks or haul-off bins and propose to implement waste removal for closure, please submit a Form C-144.

Please be advised that approval of this request does not relieve the operator of liability should operations result in pollution of surface water, ground water or the environment. Nor does approval relieve the operator of its responsibility to comply with any other applicable governmental authority's rules, regulations or ordinances.

#### Closed-Loop **DESIGN PLAN:**

The closed-loop system will not use a drying pad, temporary pit, below-grade tank or sump of any kind. The system will use an above-ground, haul-off bin suitable for holding the drill cuttings from the well and fluids for rig operations. The haul-off bin will be of sufficient volume to maintain a safe free board between disposal of the solids and liquids from rig operations.

- 1) Fencing is not required for an above-ground, closed-loop system.
- 2) The site will be signed in accordance with 19.15.3.103 NMAC.
- 3) Attached is a diagram of the closed-loop system.

#### Closed-Loop **OPERATING AND MAINTENANCE PLAN**

In order to protect public health and the environment, the closed-loop system and haul-off bin(s) will be operated to contain liquids and solids. This will aid in the prevention of contamination of fresh water sources. The following steps will be followed to ensure the proper operation and maintenance of the system:

- 1) All equipment and operations will be inspected and a log will be signed and dated recording same. The inspection will be daily when the rig is operating.
- 2) Hazardous waste, miscellaneous solid waste, or debris will not be discharged into or stored in the bins; only fluids used in or cuttings generated by rig operations will be placed/stored in the bins.
- 3) The solids and liquids in the closed-loop, haul-off bins will be transported from the drilling facility and disposed of at the Gandy Marley Inc. Facility (Permit No. NM 01-0019) when a bin is determined to be full.
- 4) Operations will be suspended and repairs will be enacted immediately upon the discovery of a compromised haul-off bin or associated equipment. The NMOCD District Office will be notified within 48 hours of any such discovery

#### Closed-Loop **CLOSURE PLAN**

- 1) The haul-off bin(s) will be maintained in accordance with 19.15.17.13 NMAC.
- 2) All cuttings and liquids will be transported to the Gandy Marley, Inc. Facility for disposal during rig operations and immediately following the completion of rig operations. The haul-off bins will be removed from location as part of the drilling rig move.
- 3) The site will be reclaimed and re-vegetated to pre-existing conditions at the time the well is permanently abandoned
