During attempts to convert this well to injection a fish was encountered in the hole at 11,496' which is near the top of the perforations. It's taking longer to clear that fish than we had anticipated. We plan to move the rig off the location and re-evaluate our approach. Future plans are to re-enter this well tag the fish and pump 25 sxs of cement. Will tag the cement plug. Run a MIT for temporary abandonment for the maximum time allowed. We will notify the OCD 24 hours in advance so that they may have the opportunity to witness the MIT.
