Cimarex proposes to construct a 250' X 250' X 8' frac tract (pond) and turnaround on the JG State lease, as shown on the attached plats. The pond is to be lined with Geofoam or caliche, to protect the surface against rocks, if any. The pond will be fenced with 5-wire barbed fencing, including a 12' entry gate. The pond will service Cimarex-operated Yeso completions within the area. Fas-lines, provided by the water-haulers, will be utilized along the existing roads to fill the pond and to transport fresh water to the wells for frac-ing.

When drilling activity has ceased within the area, the pond will be reclaimed, contoured, and re-seeded
