After setting 7 cement abandonment plugs and releasing the drilling rig on 6/26/12, approval was received from the OCD's Mr. Maxey Brown to install a permanent below-ground dry-hole plate stenciled with all information required under 19.15.16.8 NMAC.

On 7/17/12 Mr. Maxey Brown witnessed the final plate install 4' below ground level. At that time the cellar boards were removed and the rat and mouse hole shunts cut off 4' below ground level. All below grade excavations (cellar, rat & mouse) were then backfilled, the location, access road and surrounding area cleaned of debris and repairs made to the landowner's cattle guard. The location pad and the access road are now awaiting reclaim and reseed.
