13 Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recomplate in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Despite diligent efforts, as detailed in its July 12, 2012 Request for Review, H.L. Brown Operating, L.L.C. ("HLB") has not been able to obtain the required third party tester and test equipment required by Notice of Written Order 12KSB191. Accordingly, HLB requests an additional 2 months extension, until October 17, 2012, in which to continue to attempt to secure the third party tester and test equipment.

In the meantime, HLB renews its request for alternative testing, to be performed by a third party using equipment at site. As previously indicated, the well at issue does not send fluid to the Bluitt Central Facility, but produces fluid into a dedicated strapped and certified tank battery, which is measured daily. HLB will arrange to have a BLM-approved third party present for a 72 hour measuring test, to be conducted under BLM observation and supervision.
