the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones Attach the Bond under which the work will be performed or provide the Bond No. on file with BLMBIA. Required subsequent reports must be filled within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filled once testing has been completed. Final Abandomment Notices must be filled only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.) 1. Devon Energy has contracted Talon/LPE to do reclamation services at the Uncle Sam 13C Federal No. 1, a plug and abandoned location. 2. On 8/8/2012 Talon/LPE mobilized personnel to the site to carry out soil sampling activities for the construction of a work plan. Grab soil samples were collected from the surface of the location. The soil samples were sent to Cardinal Laboratories for analysis of total Chlorides via Method SM4500CHB. The results for the soil samples are attached. A site plan is also attached. 3. The chloride impacted soil at the sample located 5-7 will be excavated and transported to CRI for disposal. Comfirmation samples will be collected and tested on the location using the field tration method for chlorides. 4. The caliche will be removed from the lease road and well location. The removed caliche will be used to repair lease roads in the area or placed onto the drilligip pit area. 5. New soil will be transported in from a local borrow pit or a downsized location. A minimum of 2-foot of new soil will be placed over the top of the drilling pit area. 6. The drilling pit area and location will be contoured to match the surrounding terrain. 7. The location and lease road will then be cut, ripped, cross-ripped and windrows will be installed on the location to help prevent erosion. 1. The l	Final Abandonment Notice					•		Reclamation

RE: UNCLE SAM 13C FED. NO. 1

Enclosed are the results of analyses for samples received by the laboratory on 08/08/12 14:47.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-11-3. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab accredited certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2 Haloacetic Acids (HAA-5)
Method EPA 524.2 Total Trihalomethanes (TTHM)
Method EPA 524.4 Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

Celey & Keene

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

Lab Director/Quality Manager
