13 Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

Subject well has been shut in due to unavailability of gas purchaser for approximately 1 year +/- a few months. Operator has made an agreement with a purchaser pending results of a gas flow test. Operator intends to put well back into service for a 3 day production test to satisfy gas purchaser's requirements for setting a meter and opening for sales. Anticipate start of activities to begin early October pending availability of service rig and gas purchaser meter man. Plan to have information to proceed by mid-November at the latest.

All existing equipment will be used during operations with only expected modification being the installation of a new digital meter and supporting plumbing work.

Should the production test fail to meet purchaser requirements, Operator will either file for a TA status or Plug & Abandonment.

Approval good for 90 days. At that time the well is to be on prod. or plans submitted to abandon the well

14. I hereby certify that the foregoing is true and correct Name (Printed/Typed) JESSE R. MIDDAGH	Title Operations & Production Manager
Signature 	Date 10/02/2012
