13. Describe Proposed or Completed Operations (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Citation Oil and Gas Corp. requests permission to retain this well in a temporarily abandoned condition until 1st Quarter 2006. At that time, an attempt to recompleat the well to the Atoka formation has been scheduled. The Atoka formation in this well was briefly tested in September 1996 and produced a large amount of water. The decision was made at that time to temporarily abandon the well due to the lack of water disposal capacity on the Unit. Recently, work on the Antelope Ridge Unit wells #6, #8, #9 and #10 has shown promise by increasing production and/or reducing water production. Water production on the unit has dropped to the point where a reactivation of #4 is justified. While the water production has dropped, additional work on the ARU water disposal well (cleanout) as well as the installation of facilities to handle increased water production is required prior to the re-activation of the subject well.
