13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleting horizontally, give subsurface locations measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleting in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Henry Petroleum would like to extend TA status for this well.

Henry Petroleum has been very active this past year (2004) returning wells to production in the unit (4 wells) and the non unit (3 wells) and is already busy doing the same this year, one on the non unit and four on the unit (approved paperwork but waiting on the rig to do the actual work). Henry would like permission to keep this well TA'd for now as we have not evaluated it for feasibility to return to production. However, this work is currently under way.
