Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

On the morning of 7/12/2005, two BLM representatives - Tricia Bad Bear and Steve (?) - were onsite at the referenced lease and discovered a spill. The field supervisor for BTA, Jim Shirley, was immediately contacted and he went straight to the site. It was determined that the valve for the load line of the tanks, outside the dike, was opened up by livestock. An estimated 200-300 bbls of salt water with oil on top spilled out into an adjacent pasture. A vacuum truck was immediately contacted and will remove all possible liquid. The affected area will then be excavated; the contaminated soil will be hauled off; the site will be remediated as is necessary.

The nearest residence is 10 miles from the well site. The grazing lessee is Hershel & Gary Caviness, East Star Route, Maljamar, NM 88264.
