13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

As per our conversation with Joe Lara with the Bureau of Land Management/Carlsbad Office, Edge Petroleum would like to propose an Alternate Cement and Casing Program as follows:  
On the 7-5/8" casing set at 4270', we propose to set a DV Tool (Stage Collar) above an External Casing Packer (ECP). The External Casing Packer is to be set inside the 10-3/4" casing at 2950 +/- Cement will be circulated to surface.  
We propose the top of cement to be at approximately 2400' for the 4-1/2" production casing.

14. I hereby certify that the foregoing is true and correct
