13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

On Feb 7, 2003, Devon obtained approval from the BLM to vent gas from this well through 4/30/03. Devon obtained like approval from the State on Feb 18, 2003 for a 90-day period. Conoco and Duke have pipelines in the vicinity of this well. However, neither company will purchase this gas because of the high nitrogen content and low liquid components. A natural gas engine has been installed as the prime mover to utilize a portion of this gas as fuel. A subsequent gas analysis indicates that the nitrogen content has decreased slightly, however the pipeline companies will still not purchase this gas. Devon requests approval to continue to vent the unused portion of this gas. Periodic gas analyses will be taken to monitor the nitrogen content. If the quality of the gas improves to pipeline specifications, then necessary pipeline connections will be made to market this gas. Daily production is 70 mcf/d. See attached gas analysis
