PROPOSED DRILLING PROGRAM

Rubicon Oil & Gas, LLC Federal "34" No. 1 988' FSL & 995' FWL of Section 34, T9S, R30E Chaves County, New Mexico – 94083 Lease No. NM-94083 (Re-Entry Well)

In conjunction with Form 3160-3, Application for Permit to Drill (Re-Enter) this well, Rubicon Oil & Gas, LLC submits the following items of pertinent information in accordance with BLM requirements:

1. Estimated tops of important geological markers

San Andres	2800'
Glorieta	4060'
Yesso	4150'
Abo	6510'

2. Estimated depths at which the top and bottom of anticipated water, oil, gas or other Minerals are expected

Ground water, fresh: 200' to 400'. Surface casing. Oil – Abo 7425' – 75'. Production casing. Gas – Abo with oil.

- 3. Pressure control equipment See Form 3160-3 and Exhibit "B"
- 4. Proposed casing program See Form 3160-3

5. Proposed mud program

See Form 3160-3. No abnormally high pressure is anticipated. This is a re-entry and no abnormal pressure was encountered in the hole when drilled originally. Therefore, no special mud monitoring equipment is planned.

Testing, logging, coring program

 No DST is planned
 No open hole logs are planned
 No coring is planned
 Cased hole log will be run to tie to open hole logs run when well was originally drilled

PAGE TWO

7. Anticipated BHP, BHT, etc.

No abnormal pressure or temperature is anticipated. BHP of 2500# @ 7500' is expected. BHT of 140°F is anticipated. No H2S is expected from the Abo. Mud program will be altered to accommodate any variation from expected BHP and BHT. H2S monitoring equipment will be in place on rig floor, sub-structure and mud pits.

- 8. Other information
 - 1. Anticipated start of re-entry: April 1, 2003
 - 2. Anticipated length of re-entry operations: One (1) week
 - 3. Anticipated length of completion and testing operations: Two (2) weeks

PROPOSED DRILLING PLAN

.

WELLBORE DIAGRAM EXISTING CONDITIONS

MULTI-POINT SURFACE USE AND OPERATIONS PLAN

Rubicon Oil & Gas, LLC Federal "34" No. 1 988' FSL & 995' FWL of Section 34, T9S, R30E Chaves County, New Mexico Lease No. NM-94083 (Re-Entry Well)

This plan is submitted along with Form 3160-3, Application for Permit to Drill (Re-Enter) the subject well. The purpose of this plan is to describe the location of the well, the proposed construction and operations plan for the re-entry and the rehabilitation of the surface environmental effects associated with this operation.

1. EXISTING ROADS AND WELL SITE LOCATION:

......

- A. Exhibit "A" is a portion of two USGS Topo Maps (Oasis and Mescalero Point, N.E.) showing the location of the subject well and the existing roads to the well site. This location is about thirty-eight (38) miles East of Roswell, New Mexico and thirty-five (35) miles West of Tatum, New Mexico.
- B. Directions to Location: From Roswell, New Mexico go East on US380 Approximately thirty-eight (38) miles to "Cato Rd.". Turn North on "Cato Rd." approximately 3-1/2 miles to the third cattle guard. Immediately past the third cattle guard, turn East on caliche lease road for one (1) mile, thence North ¼ mile to Middlebrook #3, thence North 4340' on caliche lease road to location.

2. ACCESS ROAD TO BE RE-CONSTRUCTED:

- A. Existing access roads to this well site will be repaired and re-constructed to a width of 12 feet and will be approximately 11,440 feet in length. See Exhibit "A".
- B. The existing access roads will be repaired and reconstructed by grading and topping with compacted caliche and will be properly drained.
- C. Drainage design: Area is flat with rolling sand dunes. No drainage problems.
- D. Cuts and fills: None required.
- E. Culverts: None required.
- F. Turnouts: None required.
- G. Gates or cattle guards: None required. None on existing roads.
- H. Off lease right of way: None Required.

PAGE TWO

۰. ۱

3. LOCATION OF EXISTING WELLS IN THE AREA:

All wells within one (1) mile radius of the subject well are shown on Exhibit "A".

4. LOCATION OF EXISTING AND/OR PROPOSED PRODUCTION FACILITIES:

- A. There are no oil or gas production facilities on the lease at this time.
- B. If the proposed work results in commercial production, the necessary production equipment will be installed on the drilling pad.
- 5. LOCATION AND TYPE OF WATER SUPPLY:

It is planned to drill with a cut-brine water. Fresh water will be used for the rig. The brine and fresh water will be obtained from commercial sources and transported by tank – truck to the location over the re-built, existing access road.

6. SOURCE OF CONSTRUCTION MATERIAL:

Caliche for repairing the existing access roads and well site pad will be obtained from a BLM pit located in the NE/4 of the SE/4 of Section 17, T10S, R30E. The surface is owned by Mr. Marvin L. Watts of Carlsbad, New Mexico. We understand that the caliche belongs to the BLM.

- 7. METHODS FOR HANDLING WASTE DISPOSAL:
 - A. Drill cuttings will be disposed of in the reserve pit.
 - B. Drilling fluids will be allowed to evaporate in the reserve pit until the pit is dry.
 - C. Pits will be fenced with normal fencing materials to prevent livestock from entering the pit area.
 - D. Any oil produced during testing operations will be stored in tanks until sold.
 - E. Water produced during testing operations will be stored in tanks until hauled to an approved disposal system.
 - F. Current laws and regulations regarding disposal of human waste will be complied with.

PAGE THREE

۶.

- G. Trash, waste paper, garbage and junk will be contained in trash bins to prevent scattering by wind and animals and will be removed for deposit in an approved sanitary land fill within thirty (30) days after finishing drilling and/or completion operations.
- 8. ANCILLARY FACILITIES:

None Required.

9. WELL SITE LAYOUT:

- A. Exhibit "B" shows the relative location and dimensions of the drilling pad, reserve pits and major rig components. The existing pad and pit area are well defined. The pad and road are in relatively good condition.
- B. Drilling pad size: 250' x 185'; reserve pit 100' x 100'.
- C. Cut and fill: None required.
- D. The surface of the drilling pad will be topped with 4" compacted caliche. The reserve pit will be lined with plastic sheeting.

10. PLANS FOR RECLAMATION OF THE SURFACE

- A. After completion of drilling and/or completion operations, all equipment and other material, not needed for operations, will be removed. Pits will be filled and the location cleaned of all trash and junk to leave the well site in an aesthetically pleasing condition.
- B. Any pits containing fluids will be fenced until they are filled.
- C. If this well is non-productive, or when production ceases, surface rehabilitation and re-vegetation requirements of the BLM will be complied with as expeditiously as possible.

11. SURFACE OWNERSHIP

The surface ownership of the proposed well site and the existing access roads is held by the BLM. Grazing Rights are held by Andrus Ranch of Roswell, New Mexico and Mr. Kent Gabel of Sudan, Texas.

Page Four

- 12. OTHER INFORMATION
 - A. Topography: The proposed location and access road are in a relatively flat area of sandy soil, sand and sand dunes. The slope of the surface is approximately 25' per mile to the West.
 - B. Flora and Fauna: The vegetation in the area is a poor cover of miscellaneous native grasses along with mesquite, yucca, shinnery oak, cacti and miscellaneous weeds and wild flowers. The animal life consists of rabbits, fox, coyotes, snakes, lizards, dove, quail, native birds and other wild life typical of this semi-acid desert land.
 - C. Ponds and streams: None in the area.
 - D. Residence and other structures: None in the area.
 - E. Land use: Cattle grazing.
 - F. Archaeological: An archaeological survey should not be necessary since roads and well pad already exist and no new surface disturbance will be needed to repair the roads, pad and reserve pit areas.

13. OPERATOR'S REPRESENTATIVE AND CERTIFICATION

A. The field representative responsible for assuring compliance with the approved surface use and operations plan is as follows:

Darol K. Ramey Ramey Petroleum Consultants, Inc. 303 W. Wall Avenue, Suite 1005 Midland, Texas 79701 Telephone – 915/687-1192 Cellular Telephone – 915/553-0531

- Fax 915/685-4062
- B. Certification:

I hereby certify that I, or persons under my direct supervision, have inspected the proposed drill site and access route; that I am familiar with the conditions which currently exist; that the statements made in this plan are, to the best of my knowledge, true and correct; and that the work associated with operations proposed herein will be performed by Rubicon Oil & Gas, LLC and its contractors and sub-contractors in conformity with this plan and the terms and conditions under which it is approved. This statement is subject to the Provisions of 18 U.S.C. 1001 for the filing of a false statement.
