Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

VPR Operating, LLC has drilled and fraced this well. It is currently flowing back after the frac. VPR Operating requests permission to haul out and sell the oil during this operational phase. The well is currently flowing through the casing ( no production tubing in the well ) to frac tanks. The oil is moved to two vertical 400 bbl. rental tanks. Great Lakes Trucking will work the 400 bbl. tanks to obtain BSW content, temperture and oil gravity and haul the oil to Mason Station south of Orla, TX. They will down-load the oil to a lact unit belonging to Western Refining and will obtain oil volume from the lact unit. The gas will be flared while awaiting for Agave to install a short pipeline. The flow-back water is been hauled to public diaposals. The production tanks and equipment have been ordered and will be installed asap.
